

NetProcess declared in a press release that it has signed a reselling agreement with FileHold, to become a reseller in MENA & GCC territories.

The reselling agreement came in line with NetProcess efforts to increase its local and international customers as its vision to become a recognized technological company that is able to capture the pulse of the era, and continue to expand its successful cooperation with current and future partners and clients.

The agreement between NetProcess and FileHold Systems Inc. also looks to promote and implement Electronic Document Management Software EDMS in the region.

Also, NetProcess believes that the time has come to rethink seriously about the paperless environment in organizations in order to save more expenses, work professionally and to keep our earth green and clean.

Tariq Ahmed, NetProcess Business Development Manager said:

"We are working hard to reach the largest possible number of customers to achieve a qualitative leap in the concept of documents management system at all levels, and to bring the latest in technology and employ it to provide comprehensive software solutions and professionally developed tailor-made services."

"This partnership aims to bring about benefits to FileHold by providing it with all means which will promote the quality in its products around the world, especially since FileHold always look forward to implement the best products with high level of quality as a key factor for the globally reached success"

Larry Oliver, President of FileHold said:

"We, at FileHold, believe in the global rise in demand for excellence when providing products and services beyond customer expectations. Hence, comes the signing of this agreement with NetProcess as a well established IT firm in the field of Documents Management Systems"
